(54) BABY BATH AND SUPPORT MEMBER**(57)Abstract:**

PROBLEM TO BE SOLVED: To alter a shape of a baby bath into the most convenient shape for the use depending on a situation and to reduce the burden on a user for the baby bath used for bathing a baby.

SOLUTION: The baby bath 1 has support members 3, 4, 5 supporting a load of a peripheral wall part 7 and/or a load of the user of the baby bath and detachably attached to the outer peripheral surface of the peripheral wall part 7 constituting a recessed part 6 of a sufficient size to accommodate the baby through attachment means 11, 15.

**LEGAL STATUS**

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
